## T&M REWARDS PROMOTION

### SURETRACE™ CIRCUIT TRACER

**Receiver: RC-959 or RC-955**  
Provides a numeric value and variable pitch that increases as the signal becomes stronger on the wires being traced or breakers being identified.

**Inductive Clamp: IC-958**  
1" jaw opening with a powerful coil that induces a low voltage signal onto the cable without affecting the low voltage signals on the circuit.

**Battery Pack & Strap BP-958**  
Provides power for the inductive clamp and attaches to the inductive clamp with a 6" cord

**Tracer Test Lead Set: TL-956**  
Complete test lead kit includes:  
- TLOP-956 Outlet plug adapter  
- TLBP-956 (2) Blade prongs  
- TLGP-956 Ground prong  
- TLAC-956 (2) Alligator Clips  
- TLA1-956 (2) 3' Lead adapters  
- TLA-956 25' Lead adapter

**Cradle: CR-959\***  
Threaded to use on standard extension pole. Compatible with receivers for all kits.  
*\*Accessory not included with kits.*

**Transmitter: TR-955**  
Sends a 32 kHz, fixed amplitude time-modulated signal onto the circuit to be traced, which then induces an electromagnetic field onto the circuit. Will work on a de-energized circuit and won't affect GFCIs and sensitive equipment on an energized circuit.

**IMPORTANT:** This tracer is intended for use by qualified electricians. Follow NFPA 70E Standard for Electrical Safety in the workplace when using this tester. Always consult the instruction manual provided with the tester for operational limitations and procedures associated with a specific tester.
